U.S. PATENT PENDING

Go to [OnCourtOffCourt.com](http://OnCourtOffCourt.com) for a short "how to" video demonstration of the MultiNet set up, plus many photos of the 4-in-1 MultiNet in use.

## STEP #1 BASES

Unfold the two triple hinged bases to form two letter "T's" and place them on the play area about 12 feet apart.

## STEP #2 MIDDLE

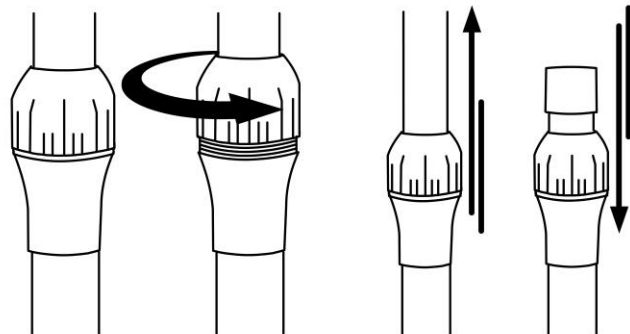

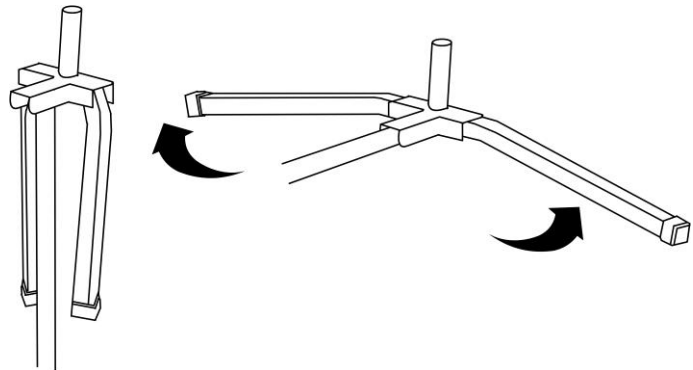

Unfold and connect the four-part bungee middle section. Connect to the two base sections.

## STEP #3 NET POLES

Insert the vertical telescoping poles into the bases. Slightly unscrew the black fitting to raise the net height.

## STEP #4 TAKE DOWN

If needed, have one person at each end slightly push in each net pole. Slide the net sleeves over the poles.

### ADDITIONAL NOTES:

1. After first use, try leaving the net on the posts and roll it up for easy storage and fast assembly. The bag has 3 compartments for efficient and organized storage.
2. Only 4 Score Markers are needed at any one time. Two will be red and two will be green. 8 are included in your package in case some are lost or damaged.
3. To use the Top Band to create a second net, attach it to the fence or the regular net on one side and the loop on the MultiNet post on the other. Attach to the fence or regular net by looping one end through any opening in slip knot fashion.
